Frequently Asked Questions

What is the main difference between a prokaryotic cell and a eukaryotic cell according to Campbell Biology 11th edition?

The main difference is that eukaryotic cells have a true nucleus and other membrane-bound organelles, whereas prokaryotic cells do not.

How does photosynthesis occur in plants as described in Campbell Biology 11th edition?

Photosynthesis occurs in plants through the conversion of light energy from the sun into chemical energy in the form of glucose, using carbon dioxide and water as reactants and releasing oxygen as a byproduct.

What is the role of mitosis in the cell cycle according to Campbell Biology 11th edition?

Mitosis is the process of cell division that results in two daughter cells with the same number of chromosomes as the parent cell, which is essential for growth, repair, and asexual reproduction.

What is the concept of natural selection as explained in Campbell Biology 11th edition?

Natural selection is the process by which populations of organisms adapt and evolve over time in response to environmental pressures, with individuals having favorable traits being more likely to survive and reproduce.

How do genes influence the traits of an organism as described in Campbell Biology 11th edition?

Genes provide the instructions for the development and function of an organism, with different versions of a gene (alleles) resulting in varying traits and characteristics.

What is the difference between a dominant and recessive allele according to Campbell Biology 11th edition?

A dominant allele will be expressed if an individual has one copy of the allele, while a recessive allele will only be expressed if an individual has two copies of the allele.

How does the structure of DNA contribute to its function as described in Campbell Biology 11th edition?

The double helix structure of DNA, composed of nucleotides with sugar, phosphate, and nitrogenous base components, allows for the storage and transmission of genetic information from one generation to the next.
