

CERTIFIED NURSING ASSISTANT MEDICAL TERMS

CERTIFIED NURSING ASSISTANT MEDICAL TERMS FORM THE BEDROCK OF EFFECTIVE AND SAFE PATIENT CARE. FOR ANY ASPIRING OR PRACTICING CNA, A THOROUGH UNDERSTANDING OF THIS SPECIALIZED VOCABULARY IS NOT MERELY BENEFICIAL, BUT ESSENTIAL. THIS KNOWLEDGE ENSURES CLEAR COMMUNICATION WITH NURSES, DOCTORS, AND OTHER HEALTHCARE PROFESSIONALS, PREVENTING MISUNDERSTANDINGS THAT COULD COMPROMISE PATIENT WELL-BEING. THIS ARTICLE WILL DELVE INTO THE CRITICAL CATEGORIES OF MEDICAL TERMINOLOGY RELEVANT TO CNAs, FROM BASIC ANATOMICAL TERMS TO VITAL SIGNS, COMMON DISEASES, AND PROCEDURES. MASTERING THESE TERMS EMPOWERS CNAs TO ACCURATELY DOCUMENT OBSERVATIONS, FOLLOW CARE PLANS, AND CONTRIBUTE MEANINGFULLY TO THE HEALTHCARE TEAM, ULTIMATELY ENHANCING THE QUALITY OF CARE DELIVERED.

UNDERSTANDING BASIC ANATOMICAL TERMS

ESSENTIAL MEDICAL ABBREVIATIONS AND ACRONYMS FOR CNAs

VITAL SIGNS: A CNA'S CORE RESPONSIBILITY

COMMON MEDICAL CONDITIONS AND DISEASES CNAs ENCOUNTER

MEDICATION-RELATED TERMINOLOGY

PROCEDURES AND PATIENT CARE TERMINOLOGY

COMMUNICATION AND DOCUMENTATION TERMS

UNDERSTANDING BASIC ANATOMICAL TERMS

NAVIGATING THE HUMAN BODY REQUIRES A FOUNDATIONAL UNDERSTANDING OF ANATOMICAL TERMS. THESE WORDS DESCRIBE THE LOCATIONS, POSITIONS, AND STRUCTURES OF THE BODY, ALLOWING CNAs TO ACCURATELY IDENTIFY AND DESCRIBE PATIENT CONDITIONS OR AREAS OF CONCERN. KNOWING DIRECTIONAL TERMS IS CRUCIAL FOR PINPOINTING PAIN OR DESCRIBING PHYSICAL FINDINGS.

DIRECTIONAL AND POSITIONAL TERMS

DIRECTIONAL TERMS PROVIDE A STANDARDIZED WAY TO DESCRIBE THE RELATIVE POSITIONS OF BODY PARTS. FOR INSTANCE, **ANTERIOR** REFERS TO THE FRONT OF THE BODY, WHILE **POSTERIOR** REFERS TO THE BACK. UNDERSTANDING THESE TERMS HELPS CNAs DESCRIBE WHERE A PATIENT IS EXPERIENCING DISCOMFORT OR WHERE AN INJURY IS LOCATED. SIMILARLY, **SUPERIOR** INDICATES A POSITION ABOVE ANOTHER PART, AND **INFERIOR** INDICATES A POSITION BELOW. THINK OF THE HEAD BEING SUPERIOR TO THE CHEST, AND THE ABDOMEN BEING INFERIOR TO THE SHOULDERS. **MEDIAL** DESCRIBES A POSITION CLOSER TO THE MIDLINE OF THE BODY, AND **LATERAL** DESCRIBES A POSITION FURTHER AWAY FROM THE MIDLINE. FOR EXAMPLE, THE NOSE IS MEDIAL TO THE EARS, WHILE THE ARMS ARE LATERAL TO THE TORSO.

POSITIONAL TERMS ARE EQUALLY IMPORTANT FOR PATIENT CARE. A PATIENT LYING FLAT ON THEIR BACK IS IN THE **SUPINE** POSITION, WHILE LYING ON THEIR STOMACH IS THE **PRONE** POSITION. THE **FOWLER'S** POSITION, CHARACTERIZED BY THE PATIENT SITTING UP AT AN ANGLE, IS OFTEN USED TO AID BREATHING. THERE ARE VARIATIONS SUCH AS SEMI-FOWLER'S (30-45 DEGREES) AND HIGH-FOWLER'S (60-90 DEGREES). THE **LATERAL RECUMBENT** POSITION MEANS LYING ON ONE'S SIDE, WHICH IS OFTEN USED FOR COMFORT OR TO PREVENT ASPIRATION. UNDERSTANDING THESE POSITIONS IS VITAL FOR TRANSFERRING PATIENTS, PERFORMING HYGIENE, AND ENSURING COMFORT AND SAFETY.

BODY CAVITIES AND REGIONS

THE BODY IS ORGANIZED INTO VARIOUS CAVITIES AND REGIONS THAT HELP IN LOCALIZING SYMPTOMS AND ANATOMICAL STRUCTURES. THE TWO MAJOR BODY CAVITIES ARE THE DORSAL CAVITY, WHICH HOUSES THE BRAIN AND SPINAL CORD, AND THE VENTRAL CAVITY, WHICH CONTAINS THE THORACIC (CHEST) AND ABDOMINOPELVIC CAVITIES. WITHIN THE ABDOMINOPELVIC CAVITY, HEALTHCARE PROFESSIONALS OFTEN DIVIDE IT INTO QUADRANTS FOR MORE PRECISE LOCALIZATION OF ORGANS AND

PAIN. THESE ARE THE RIGHT UPPER QUADRANT (RUQ), LEFT UPPER QUADRANT (LUQ), RIGHT LOWER QUADRANT (RLQ), AND LEFT LOWER QUADRANT (LLQ).

UNDERSTANDING THESE REGIONS ALLOWS CNAs TO COMMUNICATE FINDINGS EFFECTIVELY. FOR EXAMPLE, REPORTING “PAIN IN THE RUQ” IS MUCH MORE INFORMATIVE THAN SIMPLY STATING “ABDOMINAL PAIN.” OTHER KEY REGIONS INCLUDE THE **CEPHALIC** REGION (HEAD), THE **CERVICAL** REGION (NECK), THE **THORACIC** REGION (CHEST), THE **ABDOMINAL** REGION (ABDOMEN), AND THE **PELVIC** REGION (PELVIS). AWARENESS OF THESE AREAS AIDS IN ACCURATE PATIENT ASSESSMENT AND REPORTING.

ESSENTIAL MEDICAL ABBREVIATIONS AND ACRONYMS FOR CNAs

THE HEALTHCARE ENVIRONMENT IS RIFE WITH ABBREVIATIONS AND ACRONYMS DESIGNED TO SAVE TIME AND SPACE IN DOCUMENTATION AND COMMUNICATION. HOWEVER, THESE CAN ALSO BE A SIGNIFICANT SOURCE OF CONFUSION IF NOT PROPERLY UNDERSTOOD. CNAs MUST BE FAMILIAR WITH COMMON ABBREVIATIONS TO ENSURE THEY INTERPRET INSTRUCTIONS AND DOCUMENTATION CORRECTLY.

COMMONLY USED ABBREVIATIONS IN PATIENT CARE

MANY EVERYDAY TASKS AND OBSERVATIONS BY CNAs INVOLVE SPECIFIC ABBREVIATIONS. FOR INSTANCE, **VS** STANDS FOR VITAL SIGNS, A DAILY STAPLE FOR CNAs. **ROM** REFERS TO RANGE OF MOTION, WHICH CNAs MAY ASSIST PATIENTS WITH. WHEN DOCUMENTING INTAKE AND OUTPUT, **I&O** IS FREQUENTLY USED. **ADLs** ARE ACTIVITIES OF DAILY LIVING, A BROAD CATEGORY ENCOMPASSING BATHING, DRESSING, FEEDING, AND TOILETING. UNDERSTANDING THESE ACRONYMS IS CRUCIAL FOR FOLLOWING CARE PLANS AND ACCURATELY REPORTING PATIENT STATUS.

HERE IS A LIST OF SOME COMMONLY ENCOUNTERED ABBREVIATIONS:

- BP - BLOOD PRESSURE
- HR - HEART RATE
- RR - RESPIRATORY RATE
- TEMP - TEMPERATURE
- O2 - OXYGEN
- NPO - NOTHING BY MOUTH
- PO - BY MOUTH
- PRN - AS NEEDED
- STAT - IMMEDIATELY
- DX - DIAGNOSIS
- RX - PRESCRIPTION

UNDERSTANDING CHARTING AND DOCUMENTATION ABBREVIATIONS

ACCURATE CHARTING IS A LEGAL AND PROFESSIONAL RESPONSIBILITY FOR CNAs. FAMILIARITY WITH ABBREVIATIONS USED IN CHARTING SYSTEMS IS PARAMOUNT. FOR EXAMPLE, WHEN OBSERVING A PATIENT'S SKIN, CNAs MIGHT USE TERMS LIKE **ER** FOR ERYTHEMA (REDNESS) OR **EDEMA** FOR SWELLING. DOCUMENTING BOWEL MOVEMENTS MIGHT INVOLVE **BM**. IF A PATIENT IS EXPERIENCING SHORTNESS OF BREATH, IT MIGHT BE NOTED AS **SOB**. EVEN SEEMINGLY SIMPLE TERMS LIKE **c/o** (COMPLAINS OF) ARE STANDARD IN CHARTING PATIENT CONCERNS.

IT IS CRITICAL TO ONLY USE ABBREVIATIONS THAT ARE APPROVED BY THE FACILITY AND THAT YOU FULLY UNDERSTAND. MISINTERPRETATION OF AN ABBREVIATION CAN LEAD TO SERIOUS ERRORS IN PATIENT CARE. ALWAYS CLARIFY ANY ABBREVIATION YOU ARE UNSURE ABOUT WITH A SUPERVISING NURSE. THIS DILIGENCE PROTECTS BOTH THE PATIENT AND THE CNA.

VITAL SIGNS: A CNA'S CORE RESPONSIBILITY

TAKING AND RECORDING VITAL SIGNS IS ONE OF THE MOST FUNDAMENTAL RESPONSIBILITIES OF A CERTIFIED NURSING ASSISTANT. THESE MEASUREMENTS PROVIDE CRITICAL INSIGHTS INTO A PATIENT'S PHYSIOLOGICAL STATUS AND CAN INDICATE CHANGES IN THEIR CONDITION. UNDERSTANDING THE TERMINOLOGY ASSOCIATED WITH EACH VITAL SIGN IS ESSENTIAL FOR ACCURATE ASSESSMENT AND REPORTING.

TEMPERATURE, PULSE, AND RESPIRATION (TPR)

TEMPERATURE MEASUREMENT, OFTEN RECORDED IN DEGREES CELSIUS OR FAHRENHEIT, INDICATES THE BODY'S HEAT LEVEL. COMMON ROUTES FOR TAKING TEMPERATURE INCLUDE ORAL, AXILLARY (UNDER THE ARMPIT), TYMPANIC (EAR), AND TEMPORAL (FOREHEAD). A READING OUTSIDE THE NORMAL RANGE CAN SIGNAL INFECTION OR OTHER HEALTH ISSUES. **PULSE**, THE RHYTHMIC EXPANSION AND CONTRACTION OF ARTERIES CAUSED BY THE BEATING HEART, IS TYPICALLY MEASURED IN BEATS PER MINUTE (BPM). CNAs LISTEN FOR THE RATE AND RHYTHM, NOTING IF IT IS REGULAR OR IRREGULAR. **RESPIRATION** REFERS TO THE NUMBER OF BREATHS A PERSON TAKES PER MINUTE. CNAs OBSERVE THE RISE AND FALL OF THE CHEST AND COUNT THE BREATHS, NOTING ANY DIFFICULTY OR ABNORMAL PATTERNS.

BLOOD PRESSURE AND OXYGEN SATURATION

BLOOD PRESSURE (BP) IS THE FORCE OF BLOOD PUSHING AGAINST THE WALLS OF THE ARTERIES. IT IS MEASURED WITH A SPHYGMOMANOMETER AND EXPRESSED AS TWO NUMBERS: SYSTOLIC PRESSURE (THE PRESSURE WHEN THE HEART BEATS) OVER DIASTOLIC PRESSURE (THE PRESSURE WHEN THE HEART RESTS BETWEEN BEATS), E.G., 120/80 MMHG. HIGH BLOOD PRESSURE (HYPERTENSION) AND LOW BLOOD PRESSURE (HYPOTENSION) BOTH REQUIRE ATTENTION. **OXYGEN SATURATION**, MEASURED USING A PULSE OXIMETER, INDICATES THE PERCENTAGE OF HEMOGLOBIN IN THE BLOOD THAT IS CARRYING OXYGEN. A NORMAL OXYGEN SATURATION LEVEL IS TYPICALLY 95% OR HIGHER. READINGS BELOW THIS, KNOWN AS **HYPOXEMIA**, CAN SIGNIFY RESPIRATORY DISTRESS.

COMMON MEDICAL CONDITIONS AND DISEASES CNAs ENCOUNTER

CNAs WORK WITH PATIENTS ACROSS A WIDE SPECTRUM OF HEALTH CONDITIONS. HAVING A BASIC UNDERSTANDING OF COMMON DISEASES AND THEIR SYMPTOMS ALLOWS CNAs TO PROVIDE MORE INFORMED AND COMPASSIONATE CARE, AND TO REPORT OBSERVATIONS THAT ARE PERTINENT TO THE PATIENT'S DIAGNOSIS.

CARDIOVASCULAR AND RESPIRATORY CONDITIONS

CARDIOVASCULAR DISEASES ARE PREVALENT, AND CNAs often care for patients with conditions like **HYPERTENSION** (HIGH BLOOD PRESSURE), **HEART FAILURE** (THE HEART'S INABILITY TO PUMP BLOOD EFFECTIVELY), AND **MYOCARDIAL INFARCTION** (HEART ATTACK). SYMPTOMS TO WATCH FOR INCLUDE CHEST PAIN, SHORTNESS OF BREATH, AND SWELLING (**EDEMA**). RESPIRATORY CONDITIONS SUCH AS **PNEUMONIA** (LUNG INFECTION), **COPD** (CHRONIC OBSTRUCTIVE PULMONARY DISEASE), AND **ASTHMA** CAN ALSO BE MANAGED BY CNAs. RECOGNIZING SIGNS LIKE COUGHING, WHEEZING, AND INCREASED WORK OF BREATHING IS CRUCIAL.

NEUROLOGICAL AND MUSCULOSKELETAL CONDITIONS

NEUROLOGICAL CONDITIONS CAN SIGNIFICANTLY IMPACT A PATIENT'S MOBILITY AND COGNITIVE FUNCTION. CNAs MAY CARE FOR INDIVIDUALS WITH **STROKE** (CEREBROVASCULAR ACCIDENT OR CVA), **ALZHEIMER'S DISEASE**, OR **PARKINSON'S DISEASE**. OBSERVING CHANGES IN SPEECH, MOTOR SKILLS, OR MENTAL STATUS IS VITAL. MUSCULOSKELETAL ISSUES, INCLUDING **ARTHRITIS** (JOINT INFLAMMATION), **FRACTURES** (BROKEN BONES), AND **OSTEOARTHRITIS** (WEAR AND TEAR OF JOINTS), OFTEN REQUIRE CNAs TO ASSIST WITH MOBILITY, TRANSFERS, AND PAIN MANAGEMENT, USING TERMS LIKE **AMBULATION** (WALKING) AND **RANGE OF MOTION** (ROM).

ENDOCRINE AND GASTROINTESTINAL CONDITIONS

ENDOCRINE DISORDERS, PARTICULARLY **DIABETES MELLITUS**, ARE COMMON. CNAs PLAY A ROLE IN MONITORING BLOOD GLUCOSE LEVELS, OBSERVING FOR SYMPTOMS OF HYPERGLYCEMIA (HIGH BLOOD SUGAR) AND HYPOGLYCEMIA (LOW BLOOD SUGAR), AND ASSISTING WITH DIETARY NEEDS. GASTROINTESTINAL PROBLEMS, SUCH AS **CONSTIPATION**, **DIARRHEA**, AND **NAUSEA**, ALSO FREQUENTLY ARISE. ACCURATE REPORTING OF BOWEL AND BLADDER FUNCTION (**B&B**) IS A KEY RESPONSIBILITY.

MEDICATION-RELATED TERMINOLOGY

WHILE CNAs DO NOT ADMINISTER MEDICATIONS (WITH VERY SPECIFIC EXCEPTIONS IN SOME JURISDICTIONS), THEY ARE INTEGRAL TO THE MEDICATION MANAGEMENT PROCESS BY OBSERVING PATIENTS, REPORTING SIDE EFFECTS, AND ASSISTING WITH NON-PHARMACOLOGICAL COMFORT MEASURES. UNDERSTANDING MEDICATION-RELATED TERMS HELPS CNAs COMMUNICATE EFFECTIVELY ABOUT PATIENT RESPONSES.

ROUTES OF ADMINISTRATION AND DOSAGE TERMS

MEDICATIONS CAN BE ADMINISTERED VIA VARIOUS ROUTES. CNAs SHOULD BE AWARE OF TERMS LIKE **ORAL** (BY MOUTH), **TOPICAL** (APPLIED TO THE SKIN), **INTRAVENOUS** (IV, DIRECTLY INTO A VEIN), AND **INTRAMUSCULAR** (IM, INTO A MUSCLE). WHILE CNAs MAY NOT ADMINISTER THESE, THEY WILL SEE THEM DOCUMENTED. UNDERSTANDING TERMS RELATED TO DOSAGE, SUCH AS **MG** (MILLIGRAMS) FOR WEIGHT OR **ML** (MILLILITERS) FOR VOLUME, HELPS IN UNDERSTANDING MEDICATION ORDERS AND PATIENT RECORDS.

COMMON MEDICATION CLASSES AND SIDE EFFECTS

FAMILIARITY WITH COMMON MEDICATION CLASSES CAN AID IN UNDERSTANDING WHY A PATIENT IS TAKING A PARTICULAR MEDICATION. FOR EXAMPLE, **ANTIBIOTICS** ARE USED TO FIGHT BACTERIAL INFECTIONS, **ANALGESICS** RELIEVE PAIN, AND **ANTICOAGULANTS** PREVENT BLOOD CLOTS. CNAs SHOULD BE TRAINED TO RECOGNIZE AND REPORT POTENTIAL **ADVERSE EFFECTS**

OR **SIDE EFFECTS**, WHICH CAN RANGE FROM MILD NAUSEA TO MORE SEVERE REACTIONS LIKE ALLERGIC RESPONSES.

PROCEDURES AND PATIENT CARE TERMINOLOGY

MANY DAILY TASKS PERFORMED BY CNAs INVOLVE SPECIFIC MEDICAL PROCEDURES AND CARE TECHNIQUES. KNOWING THE TERMINOLOGY ASSOCIATED WITH THESE PROCEDURES ENSURES ACCURACY AND EFFICIENCY IN CARE DELIVERY AND DOCUMENTATION.

HYGIENE AND MOBILITY PROCEDURES

WHEN ASSISTING WITH PERSONAL CARE, CNAs WILL ENCOUNTER TERMS RELATED TO HYGIENE. THIS INCLUDES TERMS LIKE **PERI-CARE** (PERINEAL CARE, CLEANING THE GENITAL AND ANAL AREAS), **ORAL HYGIENE** (MOUTH CARE), AND **SKIN INTEGRITY** (THE CONDITION OF THE SKIN, CHECKING FOR BREAKDOWN OR WOUNDS). MOBILITY PROCEDURES ARE ALSO CRITICAL. CNAs ASSIST WITH **TRANSFERS** (MOVING A PATIENT FROM ONE SURFACE TO ANOTHER), **AMBULATION** (WALKING), AND THE USE OF ASSISTIVE DEVICES SUCH AS **WALKERS** AND **CANES**.

DIAGNOSTIC AND TREATMENT PROCEDURES

CNAs MAY ALSO ASSIST PATIENTS UNDERGOING DIAGNOSTIC TESTS OR TREATMENTS. THIS COULD INVOLVE PREPARING PATIENTS FOR PROCEDURES LIKE AN **X-RAY** OR **CT SCAN**, OR ASSISTING WITH SIMPLE WOUND CARE, WHICH MIGHT INVOLVE TERMS LIKE **DRESSING CHANGE** OR **IRRIGATION**. MONITORING FLUID INTAKE AND OUTPUT (**I&O**) IS ANOTHER CRUCIAL ASPECT OF PATIENT CARE, OFTEN RELATED TO DIAGNOSTIC MONITORING OR TREATMENT RESPONSE.

COMMUNICATION AND DOCUMENTATION TERMS

EFFECTIVE COMMUNICATION AND ACCURATE DOCUMENTATION ARE PILLARS OF SAFE PATIENT CARE. CNAs MUST BE ADEPT AT BOTH VERBAL AND WRITTEN COMMUNICATION, USING PRECISE MEDICAL TERMINOLOGY.

REPORTING PATIENT STATUS AND OBSERVATIONS

WHEN REPORTING TO NURSES OR OTHER HEALTHCARE PROFESSIONALS, CNAs NEED TO BE CONCISE AND SPECIFIC. THIS INVOLVES USING DESCRIPTIVE TERMS TO CONVEY OBSERVATIONS ACCURATELY. FOR EXAMPLE, INSTEAD OF SAYING A PATIENT IS "UNCOMFORTABLE," A CNA MIGHT REPORT "PATIENT C/O SHARP, STABBING PAIN IN THE LEFT FLANK" OR "PATIENT APPEARS RESTLESS AND DIAPHORETIC (SWEATY)." CLEAR AND OBJECTIVE REPORTING PREVENTS ASSUMPTIONS AND ENSURES TIMELY INTERVENTIONS.

MEDICAL CHARTING AND RECORD KEEPING

THE PATIENT'S MEDICAL RECORD IS A LEGAL DOCUMENT, AND THE CHARTING DONE BY CNAs MUST BE ACCURATE, LEGIBLE, AND TIMELY. THIS INCLUDES DOCUMENTING VITAL SIGNS, INTAKE AND OUTPUT, BOWEL AND BLADDER HABITS, ADLs PERFORMED, AND ANY CHANGES IN PATIENT CONDITION. USING APPROVED ABBREVIATIONS, SPECIFIC MEDICAL TERMS, AND OBJECTIVE DESCRIPTIONS IS PARAMOUNT. ERRORS OR OMISSIONS IN CHARTING CAN HAVE SERIOUS CONSEQUENCES, SO ATTENTION TO DETAIL IS ESSENTIAL.

FREQUENTLY ASKED QUESTIONS ABOUT CERTIFIED NURSING ASSISTANT MEDICAL TERMS

Q: WHY IS IT IMPORTANT FOR A CERTIFIED NURSING ASSISTANT TO KNOW MEDICAL TERMS?

A: KNOWING MEDICAL TERMS IS CRUCIAL FOR CNAs TO ENSURE CLEAR AND ACCURATE COMMUNICATION WITH NURSES, DOCTORS, AND OTHER HEALTHCARE TEAM MEMBERS. THIS PREVENTS MISUNDERSTANDINGS, PROMOTES PATIENT SAFETY, ALLOWS FOR PRECISE DOCUMENTATION OF OBSERVATIONS, AND ENABLES CNAs TO FOLLOW CARE PLANS EFFECTIVELY, ULTIMATELY CONTRIBUTING TO BETTER PATIENT OUTCOMES.

Q: WHAT ARE SOME OF THE MOST COMMON MEDICAL ABBREVIATIONS A CNA SHOULD KNOW?

A: SOME OF THE MOST COMMON MEDICAL ABBREVIATIONS FOR CNAs INCLUDE VS (VITAL SIGNS), BP (BLOOD PRESSURE), HR (HEART RATE), RR (RESPIRATORY RATE), TEMP (TEMPERATURE), O₂ (OXYGEN), NPO (NOTHING BY MOUTH), PRN (AS NEEDED), STAT (IMMEDIATELY), ADLs (ACTIVITIES OF DAILY LIVING), AND I&O (INTAKE AND OUTPUT). IT'S IMPORTANT TO ONLY USE ABBREVIATIONS APPROVED BY THE FACILITY.

Q: HOW DO ANATOMICAL TERMS HELP A CNA IN THEIR DAILY WORK?

A: ANATOMICAL TERMS, SUCH AS ANTERIOR, POSTERIOR, SUPERIOR, INFERIOR, MEDIAL, AND LATERAL, HELP CNAs TO ACCURATELY DESCRIBE THE LOCATION OF PAIN, INJURIES, OR OTHER FINDINGS ON A PATIENT'S BODY. POSITIONAL TERMS LIKE SUPINE, PRONE, AND FOWLER'S ARE ESSENTIAL FOR PATIENT CARE, COMFORT, AND SAFETY DURING TRANSFERS AND REPOSITIONING.

Q: WHAT ARE VITAL SIGNS AND WHY ARE THEY IMPORTANT FOR CNAs TO MONITOR?

A: VITAL SIGNS ARE FUNDAMENTAL MEASUREMENTS OF A PATIENT'S BODILY FUNCTION, INCLUDING TEMPERATURE, PULSE (HEART RATE), RESPIRATION (BREATHING RATE), AND BLOOD PRESSURE, AND OFTEN OXYGEN SATURATION. CNAs ARE RESPONSIBLE FOR ACCURATELY MEASURING AND RECORDING THESE SIGNS. MONITORING VITAL SIGNS IS CRITICAL BECAUSE CHANGES CAN INDICATE A PATIENT'S HEALTH STATUS IS DETERIORATING OR IMPROVING, ALLOWING FOR TIMELY INTERVENTION BY THE HEALTHCARE TEAM.

Q: WHAT IS THE DIFFERENCE BETWEEN HYPERGLYCEMIA AND HYPOGLYCEMIA, AND WHY SHOULD A CNA BE AWARE OF THEM?

A: HYPERGLYCEMIA IS A CONDITION OF HIGH BLOOD SUGAR, OFTEN ASSOCIATED WITH DIABETES, WHILE HYPOGLYCEMIA IS LOW BLOOD SUGAR. CNAs SHOULD BE AWARE OF THESE CONDITIONS BECAUSE THEY CAN OCCUR IN PATIENTS WITH DIABETES AND PRESENT WITH DISTINCT SYMPTOMS. RECOGNIZING AND REPORTING SIGNS OF EITHER CAN BE CRITICAL FOR PATIENT SAFETY AND REQUIRE PROMPT MEDICAL ATTENTION.

Q: WHEN A CNA DOCUMENTS PATIENT OBSERVATIONS, WHAT MAKES FOR GOOD MEDICAL DOCUMENTATION?

A: GOOD MEDICAL DOCUMENTATION BY A CNA IS OBJECTIVE, SPECIFIC, CONCISE, AND TIMELY. IT INVOLVES USING ACCURATE MEDICAL TERMINOLOGY, REPORTING OBSERVABLE FACTS RATHER THAN OPINIONS, AND CLEARLY DETAILING VITAL SIGNS, INTAKE/OUTPUT, PATIENT COMPLAINTS, ADLs PERFORMED, AND ANY CHANGES IN THE PATIENT'S CONDITION. USING APPROVED ABBREVIATIONS CORRECTLY ALSO CONTRIBUTES TO EFFECTIVE DOCUMENTATION.
